## Covington Creek Culverts

13.14

### DESCRIPTION

Construct a stormwater treatment facility for the stormwater discharge coming off Park Street. This stormwater discharge is the second highest priority to get treated because of the size of the discharge and the pollutants coming off the state route and the old downtown area.

### BACKGROUND

The summer 2012 inspections found the culverts are nearing the end of their useful life and have serious corrosion and pitting in the lower third of the culverts and a few areas where corrosion has opened holes in the culvert. The three culverts divide the small summer flow leaving only a small amount of water for fish passage. The city began design on a concrete box culvert but found there were too many conflicts to make that replacement work.

### COMMENTS

It is highly unlikely that the city would be able to come up with the funding for a bridge alternative (early estimate \$2,000,000). This project refocuses the city's funding to address the impending problem of the deteriorating culverts and improving fish passage.
